# Landmark of Construction Excellence

*Build With Confidence*

# Engineered to be the Best

Jurong Cement Limited (JCL) is the leading supplier of concrete and drymix mortar products. Our constant R&D efforts and a rigorous quality control system help to ensure that our products perform consistently well yet yield unrivalled product economy.

Over the years, JCL has made prudent investments in several strategically-located concrete batching plants and a plant for manufacturing dry mix mortar.

Today, JCL is known for our impeccable on-time delivery and excellent best-of-class products. Convinced by our customised state-of-the-art solutions, partners return time and again as a testimony of the total customer satisfaction experience we provide.

## Welding Experience with Expertise: **Our Businesses**

**JCL Readymix** was established in 1982 to meet the growing demands for readymix concrete in Singapore. The JCL ReadyMix product range includes both essential as well as premium products such as high-performance concrete like temperature-controlled concrete, high early-strength concrete, self-compacting concrete, integral waterproofing concrete and coloured concrete.

**JCL Drymix** manufactures cementitious products for waterproofing, repairs, facade and flooring application. This production line is fully automated all the way to palletising. The labour-saving products optimise efficiency, helps ensure timely delivery of projects and are designed to meet a wide range of construction challenges.

We take immense pride in our range of primary building mortars, specialty mortars and concrete durability enhancement systems. Our emphasis on innovative solutions allows us to surpass the most discerning demands.

## Innovative Solutions: **Our Products**

Used in a wide range of structures, including residential, industrial, institutional, commercial and infrastructure, our high-demand products are segmented into 3 core categories, and they are:

**Geo** – Green, eco-friendly products using recycled materials such as Washed Copper Slag (WCS) that is used to replace increasingly scarce sand; Recycled Concrete Aggregates (RCA) and Supplementary Cementitious Materials (SCM) like steel slag and fly ash.

**Premium** – High technology products with features to facilitate special applications such as high and early strength, waterproofing features to cater to prestigious construction works.

**Essentials** – The nuts and bolts of the construction industry, these are the robust essentials required in any construction work.

All JCL products are durable and of a consistently high quality to provide excellent structural performance for maximum productivity.

## Visionary Architects: **Our People**

The JCL leadership comprises dynamic, experienced individuals equipped to take the company to the next level. Committed custodians of the JCL brand, they apply creative but pragmatic business practices to keep the company on course yet remain alert to new growth opportunities.

The rest of the JCL team is a formidable force of technicians and service professionals whose dedication to excellent customer service is exemplary. They possess in-depth product knowledge and keep abreast of industry advancements while maintaining international ISO certifications with a concerted effort.

JCL offers an enriching work environment where open communication exists between management and staff. Creativity among staff is highly encouraged which in turn spurs personal development among all team members.

## Build with Confidence: **Our Future**

Since inception in 1973, JCL has built up a reputation as a reliable, trustworthy and innovative manufacturer and supplier of construction materials. We have earned the trust of our customers and will continue to build our brand name by delivering on our promise for outstanding installation processes, excellent after-sales service and uncompromising product warranty.

We are here to put up buildings that last. We will be an integral part of Singapore's ever-changing landscape.

## Our Vision

JCL helps in building Singapore. JCL is contributing actively and successfully to the construction of Singapore in an efficient, innovative and sustainable manner.

## Our Mission

At JCL, we make our customers more successful.
